**Absolute Magnetics**

LOOKING FOR

CUSTOMERS

FUNDING

PRE-SEED, SEED

PRODUCT DESCRIPTION

Absolute Magnetics invented a new magnetic encoder technology for absolute position detection. The product consists of a magnet with a patented, multi-periodic magnetization pattern and corresponding electronics for smart data processing. The highlights of the technology are the unbeatable price-performance ratio and the robustness of the encoder. Even with large mounting tolerances, changing air gaps and strong external stray-fields, an accuracy of less than 0.5° can be achieved without any calibration process.

PRODUCT DESCRIPTION

Ecorobotix is a Swiss Certified B Corporation® dedicated to revolutionizing agriculture through artificial intelligence and high-precision technology. Our mission is to promote environmental sustainability by reducing the use of plant protection products and minimizing soil impact. We have developed the ARA precision sprayer, featuring our innovative AI Plant-by-Plant™ software, which allows for precise, plant-by-plant detection and spraying during crop treatment. This technology significantly reduces the amount of product used, enhances crop yields, and lowers CO2 emissions.

PRODUCT DESCRIPTION

We produce affordable and highly capable robotic hardware designed to mimic human dexterity. Our hardware is paired with a "generative model for human dexterous motion," enabling our robots to execute a wide range of tasks in unstructured environments, driven by natural language prompts. Our AI model is pre-trained using imitation learning on large datasets of human task performance and is fine-tuned on-site to meet specific client needs.
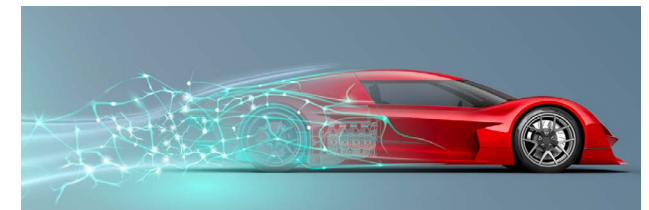

PRODUCT DESCRIPTION

Neural Concept's 3D AI platform fully unlocks the potential of Engineering Intelligence –which places AI & data at the core of the product design process– by transforming how engineers work and solve complex design challenges, while allowing them to reduce development times by up to 75%.

The platform enhances cross-functional collaboration and empowers engineers to 10x accelerate their impact, building, customizing, and deploying advanced AI-driven workflows that leverage their company's historical data, expertise and product characteristics.

PRODUCT DESCRIPTION

NUSHU smart shoe, is a new neurological assessment standard to analyze gait. NUSHU utilizes advanced sensors embedded inside the shoes and AI algorithms to collect gait data from patients. It is used at clinics to perform clinical gait assessments. NUSHU can perform real-time gait analysis and give vibrotactile feedback to patients. It is used by patients as it can give closed-loop sensory stimulation to patients: the shoes can detect gait events in real-time and stimulate the patient at a precise moment by giving vibrations on the shoe to support them while walking. It supports aging populations in maintaining independence by improving their mobility and promotes equitable healthcare access and innovation.

AI Center

ETH AI CENTER

PRODUCT DESCRIPTION

The EPFL AI Center is a multidisciplinary hub and a place of exchange for AI education and research and innovation. We work closely with both public and private sectors and believe in building strong partnerships with the industry. Our mission is to shape a future where AI benefits everyone, pioneering research that meets real-world needs, fostering inclusive education, and building lasting partnerships across industries and communities. Our efforts and collaborations are focused on defining AI solutions that are ethical, transparent, and beneficial to all members of society and the planet.

PRODUCT DESCRIPTION

As ETH's central hub for artificial intelligence, we bring together researchers of AI foundations, applications, and implications across all departments of the university. We foster research excellence, industry innovation, and AI entrepreneurship to promote trustworthy, accessible, and inclusive AI systems. The ETH AI Center has launched a number of lighthouse activities to promote responsible AI, in particular the AI House – a multistakeholder initiative uniting diverse voices to drive thought leadership, foster collaboration, and shape the future of AI on the global scale.
